

## **Important information about Easton's trash collection and recycling service!**

The Selectmen and Waste Management have renewed the Town's preferred vendor trash and recycling contract with some major improvements.

### **A 96 gallon cart will replace the small recycling bins.**

In July each subscriber will receive a new 96 gallon recycling cart to replace the smaller bins. You will be able to co-mingle all your recyclables in the cart and place it next to your trash cart every other week. This will eliminate the need to use multiple bins to recycle, making it easier to recycle more. No more dragging all those bins out on recycling day!

### **Bulky item pick up at no additional cost**

Bulky items will now be able to be placed curbside two times each year for no additional charge. One week each spring and fall will be designated for bulky item collection. If these times are inconvenient you can still call Waste Management to arrange a special pick-up for a small fee.

**Recycling more not only helps the environment, it saves money helping us to keep the subscription rate low.**

Thanks to the support from our residents the program has been successful, keeping rates low for everyone and **recycling over 2500 tons** of trash that would have gone to landfills or incinerators. It actually saves money to recycle and you can be proud of your efforts to protect the environment!

### **Fifth consecutive year without a rate increase**

Because Waste Management has agreed to restructure the rate to include the cost of the 96 gallon cart and a new bulky item pick up program, the rate will remain the same for at least one more year. In addition, the new contract provides for the possibility of lower rates if subscriptions increase.

Please call (508) 230-0888 if you would like to sign up or if you have any questions about the program.
