

Construction of the Five Corners Sewer District Project is Substantially Complete

- There are no planned construction activities scheduled at this time until permanent paving operations begin in mid-September/October. While there may be minor punch list work taking place at times, no significant traffic disruptions are anticipated. Weekly construction updates will resume prior to the beginning of paving operations in the fall.
- The permanent paving of Bay Road, Depot Street, and the portion of Foundry Street east of Bay Road, along with the final surface course of paving on all roads impacted by the project is tentatively scheduled to take place in September/October. The Foundry Street detour will be reactivated again in the early fall to accommodate the completion of final paving surface treatments.

Notice to Property Owners – Five Corners

The Five Corners Sewer District construction is substantially complete and ready for connections. **Property owners in the Five Corners Sewer District that would like to connect should contact a Licensed Drain Layer or contact a contractor who is eligible to become licensed to begin the process of connecting to sewer.** The cost to connect to the sewer lines installed by the Town is the responsibility of the property owner. The Easton Department of Public Works would like to recommend getting as many quotes as possible for the work and to be clear on what is or is not included in the scope of work (*i.e. restoration of lawns, driveways, walkways, removal of trees, internal plumbing changes, abandonment of septic or cesspool, pumping of the old system, cost of permits, etc.*). Only Licensed Drain Layers (or those applying to be licensed) may apply for a sewer permit. The Town of Easton will License contractors that have experience installing municipal sanitary sewer, possess the required insurance, and have posted a \$5,000 performance bond. Please note that those properties that need to connect via a low pressure pump should contact a professional engineer to design and stamp the low pressure system.

For each connection to municipal sewer the Drain Layer will need to obtain the following permits:

- **Sewer Permit** from the Department of Public Works (\$150 fee)
- **Trench Permit** from the Building Department (\$50 fee)
- **Permit to Abandon** the existing system(s) from the Board of Health (no fee for abandonment related to sewer connection)

Each of these permits is available for download from the **Public Works Permit webpage**. Permits and the associated application fees must be submitted to the respective Departments for approval. Property owners in the Five Corners Sewer District can learn more about the process of connecting to the sewer system by calling **508-230-0800** or by clicking on **this link** to the the Public Works Permit webpage.

Twenty-Four Hours A Day, Seven Days A Week

Our Team is available to you twenty-four hours a day, seven days a week. Should you have any questions or concerns about construction, you may email the project team at fivecorners@easton.ma.us or call **(888) 527-6797**.
