

Scheduled Construction Activities for the Week of August 26, 2019

During the week of August 26, 2019, C. Naughton Corp is tentatively scheduled to perform the following construction activities:

- Water main installation is anticipated to be completed near the intersection of Gaslight Lane on Monday, August 26, 2019 followed by the completion of temporary trench paving.
- The installation of associated fire hydrants will be completed and the new water system will be prepared for testing.
- Construction crews will perform stream crossing operations to facilitate the installation of water main, sewer piping, as well as the installation of associated structures in the south shoulder of the roadway on Foundry Street in the New Pond area.
- ***Preparations for testing of the new 12-inch water main between Robert Drive and the Five Corners intersection may result in temporary disturbances to the surrounding water system as well as to residences and businesses on the temporary water system. The Water Department will be working closely with the contractor to mitigate and quickly remedy any such disturbances.***
- Crews will also focus on general site housekeeping and maintenance; weather permitting, trench restoration activities will occur throughout the week at all work areas in advance of the Labor Day holiday weekend.

Temporary Water Main Bypass

As part of the Five Corner's Sewer Construction Project; the Town's contractor

will begin to install temporary water main bypass. This work involves the following tasks, which may cause a temporary disturbance to you:

- Temporary bypass piping and hose could be installed along the side of the roadway. Watch your step when walking around any exposed infrastructure and avoid damage to your vehicle by driving cautiously near the temporary piping.
- The installation of the water main bypass may require that the water to your property be temporarily be interrupted. We will work diligently to mitigate all service disruptions.
- Property access may be required to provide temporary water service to your property.
- Due to the increased water pressure in the water main, you may experience air in your interior plumbing or discolored/cloudy water. We recommend that you run your cold water until the air passes and the water becomes clear.

If you encounter any issues that persist from this work, contact the Five Corners Construction Hotline at **(888) 527-6797**. Your patience and cooperation is appreciated. Visit www.fivecornerssewer.com for more information about this project.

The Foundry Street detour is operational and will remain in place 24 hours a day, 7 days per week until the winter months when it will be deactivated. It may be necessary to reactivate the detour in the spring of 2020 for roadway restoration activities. Traffic monitoring will continue throughout the project, and adjustments will be made as necessary.

Construction activities will be performed Monday through Friday between the hours of 7:00 a.m. and 4:00 p.m. Please plan ahead for travel and expect delays. The Town of Easton appreciates your patience during this construction project and reminds everyone to please drive safely.

Sewer Service Information Form

The [sewer service information form](http://www.fivecornerssewer.com), is available on the [fivecornerssewer.com](http://www.fivecornerssewer.com) website. This form is necessary to allow your sewer service pipe to be installed at the correct location along your property line. You can email the completed form direct to Chris Munroe at MunroeC@peerpc.com. If you have any questions, or need assistance in filling out the form, please do not hesitate to contact Chris at **(802) 598-1155**.

During construction, the Project Site Representative, Chris, may request access to your home to help locate your existing sewer line / septic pipe. His photo is displayed for safety reasons. We do not recommend letting anyone into your home unless you've verified who they are.

Twenty-Four Hours A Day, Seven Days A Week

Our Team is available to you twenty-four hours a day, seven days a week. Should you have any questions or concerns about this project, you may email us at fivecorners@easton.ma.us or call us at **(888) 527-6797**.
